EDUCATION

Bilkent University, Ankara, Turkey

Bachelor of Science, Electrical and Electronics Engineering Expected 2028

Relevant Coursework: Circuit Theory, Probability and Statistics, Analog Electronics, Microcontrollers and Embedded Systems, Digital Logic Design

PROJECTS

Password-Protected Irrigation Monitoring System (ARM Cortex-M0+) 2026

- Built an embedded irrigation monitoring system in C using FRDM-KL25Z.
- Integrated ADC-based moisture sensing, interrupt-driven sensors, LCD UI, and keypad password protection.
- Applied embedded C programming, ADC interfacing, and interrupt handling; strengthened skills in real-time embedded system design and secure user interface implementation.

27 MHz AM Transceiver (TRC-11)

2025

- Built and tested a complete AM transceiver including transmitter, receiver, audio amplification, and AGC.
- Achieved two-way wireless communication at approximately 24 meters using RF tuning and signal testing.
- Used RF circuit design, signal tuning, and debugging tools; gained practical experience in analog communication systems and wireless signal optimization.

FPGA-Based Basketball Scoreboard (Basys 3, VHDL)

2024

- Designed a real-time digital scoreboard in VHDL on Basys 3 FPGA.
- Implemented countdown timer, multiplexed seven-segment display, and sensor-based scoring with debouncing.
- Developed skills in VHDL, digital logic design, and hardware timing; improved ability to design synchronous FPGA systems with reliable real-time operation.

TECHNICAL SKILLS

Programming: Python (fundamentals), C (Embedded), MATLAB

Python Concepts: OOP basics, Data Structures, Searching & Sorting, File I/O

HDL: VHDL

Tools: LTspice, Proteus, LaTeX

Languages: Turkish (Native), English (C1 – Advanced)

CERTIFICATIONS	• C1 Advanced English Certificate, Kaplan International Languages, Cambridge 2025	Completed one-month English language program in Cambridge, UK.
EVENTS / PROGRAMS	Amazon University Bootcamp — Participant	2024
	• Completed sessions on Machine Learning fundamentals and industry applications.	
	Amazon Mentorship Program — Mentee	2024
	• Completed an 8-week mentorship with AWS engineers, working on the “Smart Scale” hardware–software integration project.	
LEADERSHIP & ACTIVITIES	Executive Board Member, Management and Economics Community (MEC), Bilkent University	2025 – Present
	• Contribute to organizing professional and technical events and support community operations as part of the executive board. • Helped with coordination of Investment Weekend Ankara (2026), MEC Career Trip Germany (2026), StepForward Conference (600+ participants, 2025), and MEC Career Trip Istanbul (2025).	
	Head of MEC “Chase the Case” Event	2025 – Present
	• Leading the organization and execution of university-wide case study competitions. • Organized a case study event in collaboration with Turkish Airlines (THY).
